

fodojo

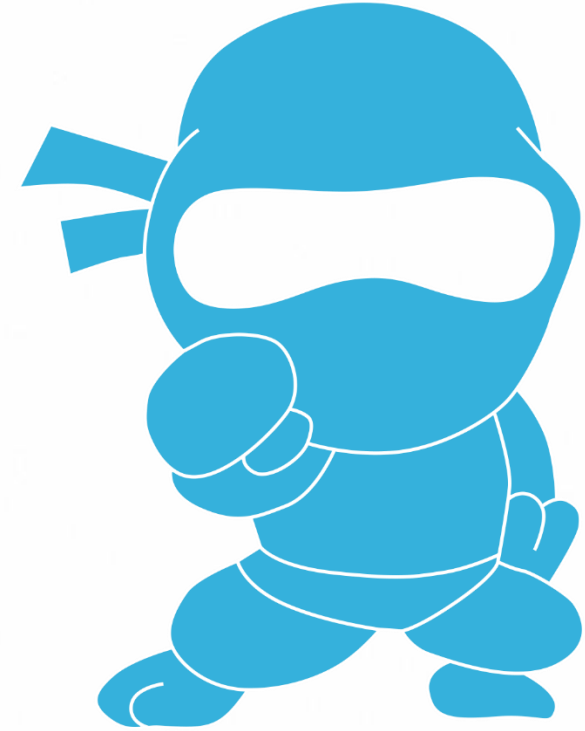

Digital Production

About Us

Fodojo LLC, founded in 2012 by two brothers, Igor and Pavel, is the second home for most hard-working and creative team of developers, PMs, HTML coders and QA testers.

We work with the most honored digital agencies in Ukraine: Aimbalance, AdPro, Leo Burnett to name a few, providing high quality and fast development services. Each team member has 5-7 years experience in digital production.

7 years, prior to launching Fodojo LLC, Igor and Pavel worked in Ukraine's top digital agencies and startups. Aimbalance, Brainberry, Mapia, IT-Lynx to name a few.

At Fodojo we created dozens of interesting projects for our clients. See "Projects" section for more information.

Services

Backend Development

JSON API, payments
integration etc.

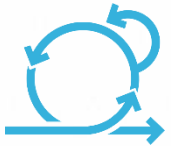

QA Testing

Site diagnostic, security
check and optimization

Frontend Development

JavaScript, CoffeeScript,
Angular.js, React.js, SaaS

Management

Scrum

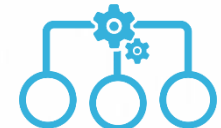

Mobile Apps

Android and iOS

Web Development

RoR, Sinatra

Project Architecture

SaaS, B2B, UML, ERD

Technologies

Here at Fodojo we mastered a vast variety of technologies we use to launch complex and integrated projects for both: web and mobile.

Why Rails? Ruby on Rails shines in the MVP stage of a product development, where convention over configuration does miracles, providing these benefits:

- Faster Development
- Flexibility
- Cost Effectiveness
- High Quality Output
- Complex Website Creation
- Agile

Our expertise also covers: Social Platforms API, Google Analytics, Online Payments (Paypal, Stripe etc.) and Data Security

Developer

Workflow

For complex projects, we are using continuous integration practice. It gives us very good quality and development speed. Also, we are using such tools as Code Climate, Semaphore and Jira (Scrum)

Projects

Pepsi Norm

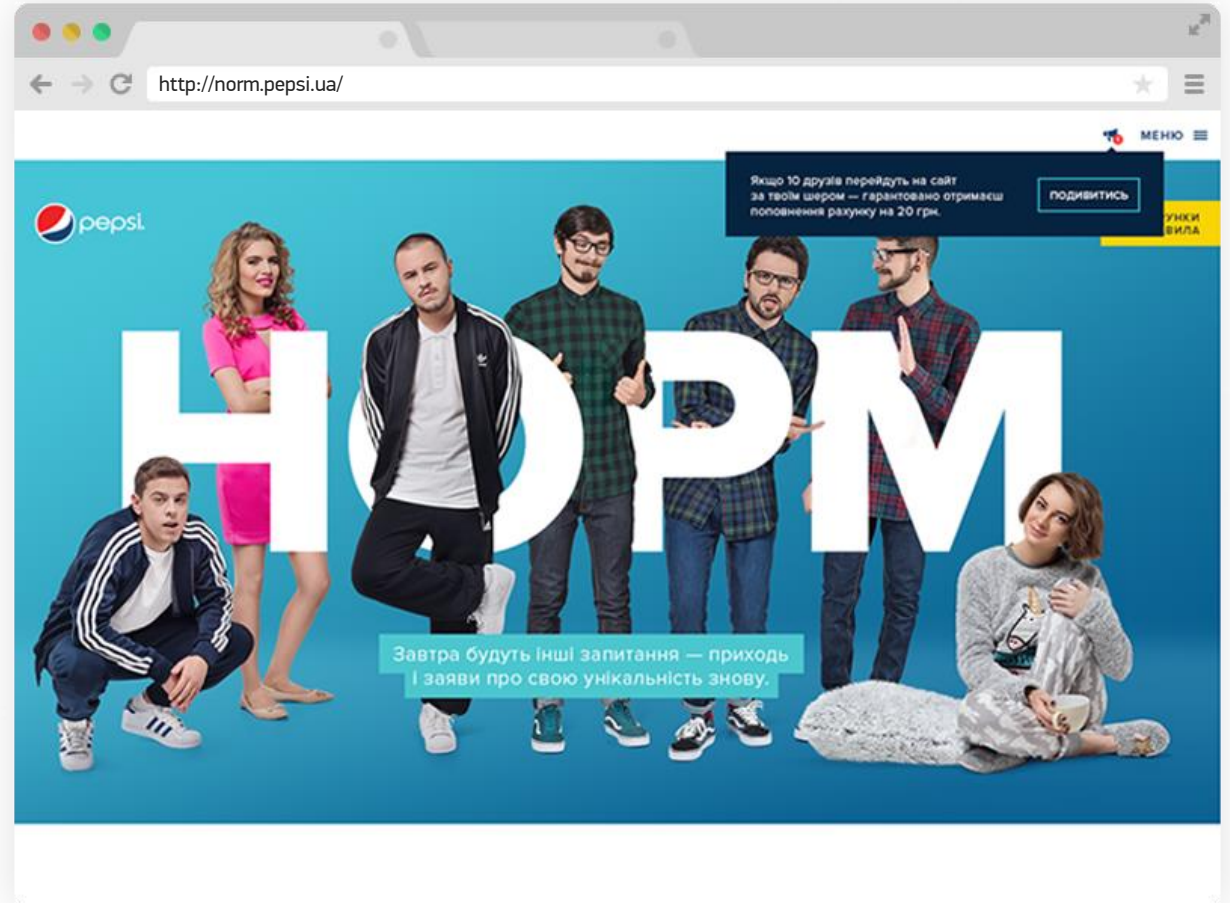

norm.pepsi.ua

Interactive website for Pepsi: user answers 5/10 questions, then shares his result to social platforms Facebook or Vkontakte to win prizes.

To win guaranteed prizes users invite friends by sharing special individual invite URL. When more than 10 friends follow a link and join the site, - the prize is yours!

Technologies used

Ruby On Rails, JavaScript (Coffee), PostgreSQL, Facebook and VKontakte API

Projects

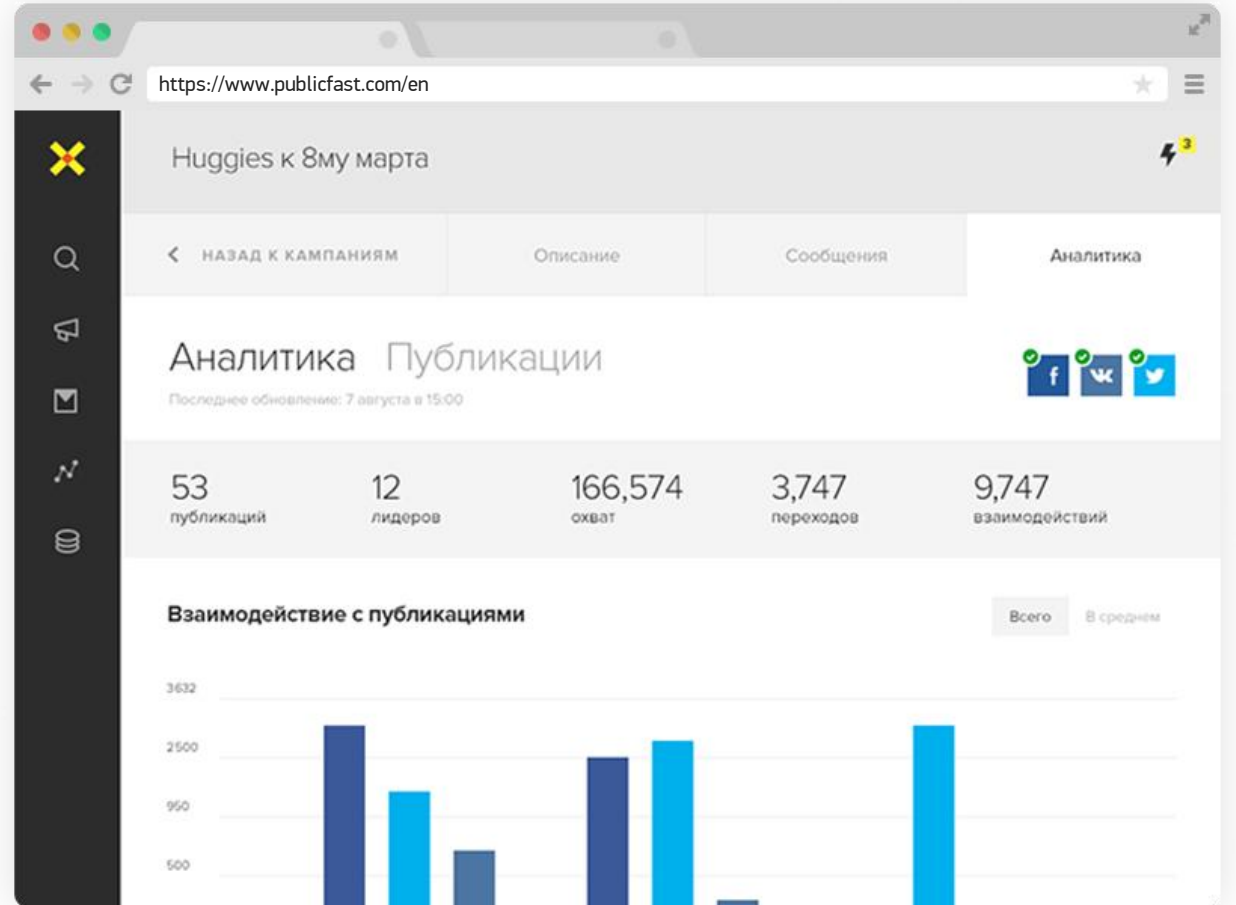

Publicfast

www.publicfast.com/en

Platform for promotion through opinion leaders' social reach developed for Publicfast startup. The place where brands and influencers get together and create social media projects.

Technologies used

Rails with PostgreSQL for backend. Grape API for fetching analytics. Websockets for real-time data. Sidekiq for background jobs. Payments via Stripe. Hard integration with Facebook, Twitter, Instagram and VKontakte API

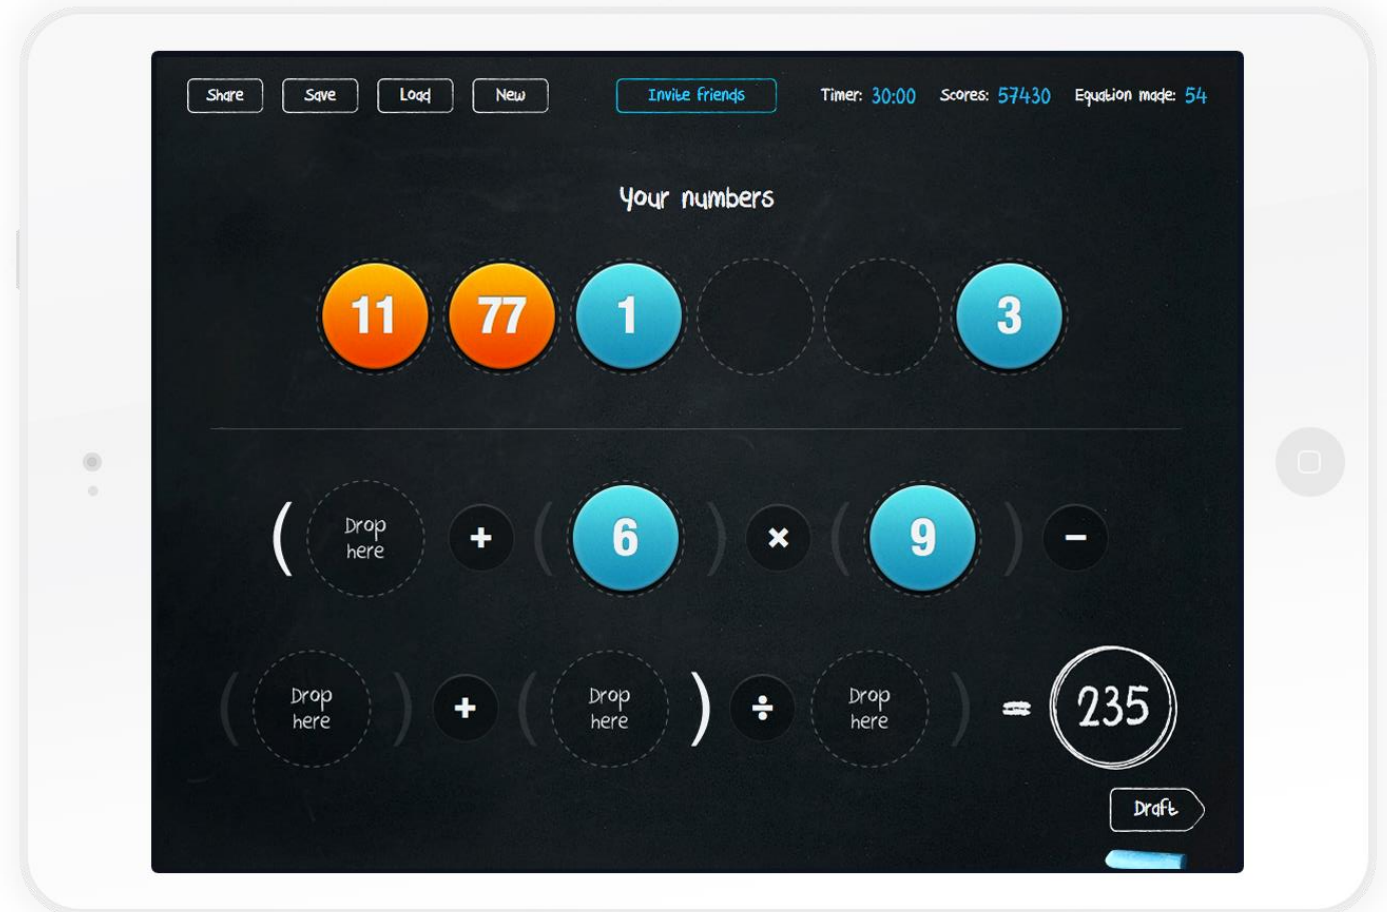

Projects

Math Tick App

Math game puzzle for iPad

Technologies used

HTML5, JavaScript,
Backbone.js, PhoneGap

Projects

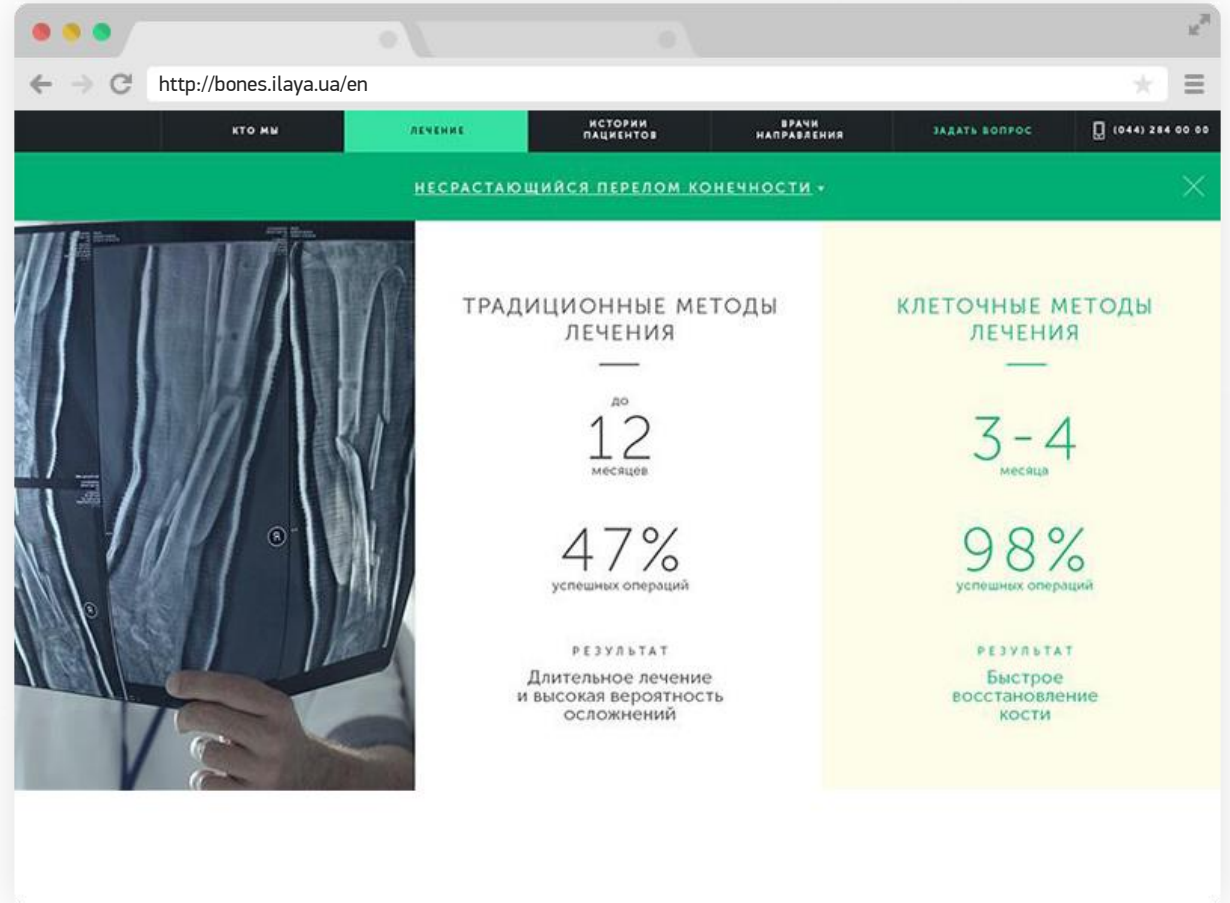

Ilaya

bones.ilaya.ua/en

Responsive single page website.

Technologies used

Ruby On Rails, PostgreSQL,
JavaScript (CoffeeScript),
Full page caching.
